Languages: Arabic (Native), French (Advanced), English (Fluent)

Professional Summary

AI Engineer specializing in **LLM agents**, **RAG systems**, and **production computer vision**. Currently building local-first AI automation at **Segula Technologies** with Ollama multi-agent councils, explainable anomaly detection, and full-stack deployment (FastAPI, Next.js, Docker). Experienced shipping air-gapped GenAI pipelines, real-time CV inference, and MLOps-ready model serving.

Technical Skills

- **Generative AI & LLMs:** RAG, Ollama, LangChain, multi-agent orchestration, LoRA fine-tuning, Self-RAG, DeepEval.
- **Computer Vision:** PyTorch, UNet, YOLO (Ultralytics), OpenCV, real-time inference, Albumentations.
- **MLOps & Serving:** FastAPI, Docker, MLflow, Airflow, GitHub Actions, SHAP, drift detection.
- **Stack:** Python, Hugging Face, Qdrant, ChromaDB, Celery, PostgreSQL, React/Next.js.

Professional Experience

- **Segula Technologies** **Casablanca, Morocco**
Final-Year Intern (PFE) — AI Engineer *Feb 2026 – Present*
 - Built **AutoCrashCheck**, a local-first audit platform combining a **5-agent Ollama LLM council**, **Isolation Forest**, and **SHAP** explainability for crash-simulation decks.
 - Delivered **Next.js**, **FastAPI**, **PyQt**, and **CLI** surfaces from one shared **AuditService** for OEM-confidential, air-gapped workflows.
 - Containerized the stack with **Docker Compose** and optional **Airflow** retraining DAGs; 100% on-prem LLM inference.
 - Cut manual engineering review time by **70%** via automated feature extraction and JSON/PDF risk reports.
- **GEOFLY** **Meknes, Morocco**
Computer Vision Engineer Intern *Jul 2025 – Sep 2025*
 - Shipped a production **Light UNet** reaching **83.34% IoU** at **312 FPS** GPU inference from aerial imagery.
 - Deployed **FastAPI** model serving with **Docker Compose**, Redis caching, and Prometheus/Grafana monitoring.
 - Built GIS polyline extraction with automated **GeoJSON** export for downstream geospatial applications.
- **Saiket System** **Remote / Meknes**
ML Engineer Intern *Mar 2025 – May 2025*
 - Deployed churn prediction models (**80% recall**, **70% precision**) through containerized **CI/CD** pipelines.
 - Managed experiment tracking and model registry in **MLflow** for reproducible promotion to production.
 - Automated training-data pipelines with **GitHub Actions** and **Docker**.

Key Technical Projects

- **Sovereign Enterprise RAG** | *Ollama, Qdrant, FastAPI, Celery, MLflow, React*
Air-gapped **RAG** platform with hybrid retrieval, async Celery ingestion, Self-RAG verification, and DeepEval A/B evaluation targeting 35% hallucination reduction.
- **Building Segmentation AI** | *PyTorch, UNet, FastAPI, Docker*
End-to-end CV pipeline for automated building segmentation from aerial imagery with production API deployment and GIS-ready outputs.
- **Scholarship Pathway Chatbot** | *LangChain, Ollama, Streamlit, Python*
Local **RAG chatbot** over structured scholarship data using **Mistral** and embedding retrieval for student pathway guidance.

Education

- **ENSAM Meknes** **Meknes, Morocco**
State Engineering Degree — Industrial Engineering, AI & Data Science *Sep 2021 – Present*

Certifications

- **AWS Cloud Practitioner Essentials** – AWS Training (Jan 2026)
- **Six Sigma Yellow Belt** – ECLEE (Apr 2025)
- **Python Machine Learning & Data Science Bootcamp** – Udemy (Jan 2025)
